UNA•FOAM

INSULATED WALL PANELS

Firestone, the industry leader in metal cladding products, is pleased to introduce our new UNA-FOAM™ line of Insulated Metal Panels.

Our foamed in place Insulated Metal Panels are engineered and tested to meet the most rigorous

performance standards in the industry. UNA-FOAM insulated metal panels offer a broad range of colors, finishes and thicknesses for complete design flexibility.

Whatever your metal cladding needs ...
Rely on Firestone!

Flat

An ideal solution for high-profile architectural projects, UNA-FOAM Flat profile panels can be installed either vertically or horizontally.

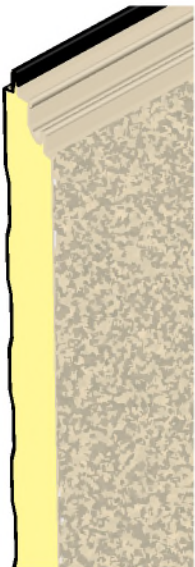

Select from various module widths and reveals for maximum design flexibility. Flat panels are attached with concealed clips and fasteners in the side joint, providing a flush appearance.

Classic

The UNA-FOAM Classic profile provides the appearance of finished precast concrete.

The Classic profile panel offers a durable finish that is highly impervious to impact and abrasion.

Stucco

The UNA-FOAM Stucco profile allows you to achieve an attractive stucco appearance sought by many building designers and communities.

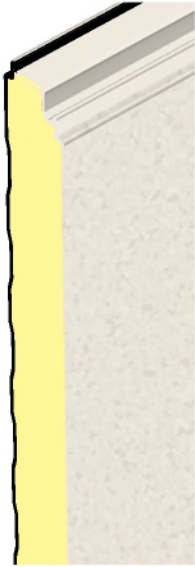

The Stucco profile panel offers a durable finish that is highly impervious to impact and abrasion.

Corrugated

The UNA-FOAM Corrugated profile combines a traditional single skin ribbed panel appearance with a polyurethane foam core.

Achieve the look of a traditional roll-formed panel with the exceptional thermal performance of an insulated metal panel.

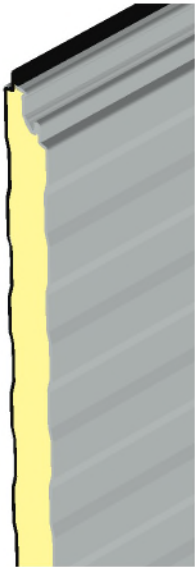

Southwest

The UNA-FOAM Southwest profile provides a flat exterior coupled with an embossed, stucco texture replicating the look of a masonry stucco material.

Striated

An attractive and economical alternative, the UNA-FOAM Striated profile is lightly profiled with narrow striations to 1/32" depth, presenting a flat appearance from a short distance away. The Striated profile is an exceptional value providing an aesthetically pleasant look combined with the superior performance from our polyurethane core.

Sonoma

The UNA-FOAM Sonoma profile is ideal for any commercial or industrial application. Sonoma panels are lightly corrugated with a 1/8" deep profile on both the exterior and interior faces of the panel ensuring a symmetrical appearance.

Sonoma Light

The UNA-FOAM Sonoma Light profile is also ideal for any commercial or industrial application. Sonoma Light panels are lightly corrugated with a 1/16" deep profile on both the exterior and interior faces of the panel ensuring a symmetrical appearance.

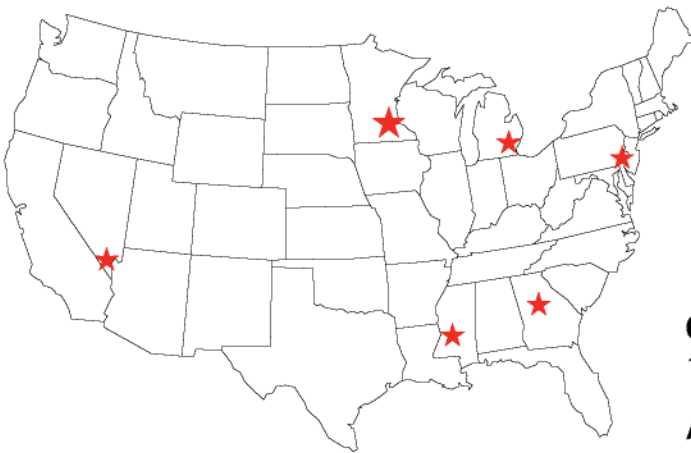

Firestone Metal Products is your best resource for Architectural Metal Products – so unleash your creativity – we’ve got you covered

Firestone Metal Products offers the complete UNA-FOAM™ line of insulated panels systems for full design flexibility.

When you choose UNA-FOAM, you’ve chosen the complete solution:

- A knowledgeable team of engineers, fabricators, and customer service professionals supporting you from initial design to project completion
- A nationwide network of Representatives providing local service and support
- Design freedom through fabricating capabilities and material options
- A commitment to manufacture a quality product, ensuring lasting aesthetic performance
- A green solution with materials providing longer product life-cycles and recyclability*
- Optimizing delivery times through national manufacturing and distribution

**Dependent on recycling programs in your area.*
